HEREFORDS
CANOVA, SOUTH DAKOTA

2026 PRIVATE TREATY BULL SALE

Welcome to our 2026 Private Treaty offering and a sincere “thank you” for your interest in our program.

We have been selling Hereford Bulls by Private treaty for over 70 years from eastern South Dakota where our focus has always been on the commercial cattlemen. We are committed to the success of your operation and will help you find the bull that best fits your needs and program. We feel it's our job to continually improve our herd to meet your needs and give you the best genetics possible. Our goal is to make your operation more profitable. When that happens, we all win.

Our bulls are carefully selected with performance in mind and the ultimate goal is to help put more dollars in your pocket. They should get your cows bred, sire moderate birth weight calves with eye appeal that gain efficiently and finish well. The bulls are sound and developed with longevity in mind. We will continue to work hard to give you genetics that can efficiently excel at growth, give you a valuable end-product and still leave you with a pasture full of exceptional females that will keep your operation profitable for years to come. More and more cattlemen are realizing the benefits of using Hereford genetics on their angus-based cows. The added pounds, with increased fertility, longevity and efficiency along with good dispositions are reason enough. However, they have also found the added benefit of the F-1 female. They are highly maternal, durable females that are some of the most sought-after females in the cattle business.

The momma cows are the factory and we put a lot of emphasis on the maternal side of the pedigree. Our cow herd is based on a combination of Line One and Canadian genetics with disposition being of utmost importance. We have all slowed down a step and the kids are helping more and more, so there is no cow worth someone getting hurt. Good udders, fertility and sound cattle are must. They graze from late April until December and are expected to calve on time, be low-maintenance

and raise a good calf.

We use ET and AI in our program to help deliver some of the top Hereford genetics into your herds. The bulls are continually evaluated so we only offer the very best bulls for sale that we would feel confident using in our own herd. These proven genetics should sire uniform, consistent calves. There's no guess-work with the 2 year olds. They are developed for longevity and what you see is what you get. The thickness, the length and overall performance are evident in this group. New this year, you will notice there are some polled bulls for sale. We have maintained the horned genetics on the maternal side while adding in some polled genetics via AI. Our customers have been asking, so here they are!

Our bulls are for sale at any time, but generally sell from January to May on a first-come, first-serve basis. All bulls will be semen tested with all breeding shots and ready to turn out and go to work for you. We feel these bulls are high quality and affordably priced offering you a good value for your dollar.

We'd love to have you come visit any time....
